

## OUR COMMITMENT TO ENVIRONMENTAL MANAGEMENT

Arena Pharmaceuticals, Inc. and its subsidiaries (“Arena”, or the “Company”) are committed to using safer, smarter, and more environmentally sustainable business practices. The Company is seeking innovative methods to improve patient health, operate responsibly, and act as a steward of good environmental management.

Arena recognizes the environmental risks associated with its operations both locally and globally. The Company is actively implementing environmental management programs to mitigate such risks in the key areas of energy, water, waste and pharmaceuticals in the environment. Arena’s environmental management system aims to ensure compliance with applicable laws and regulations in the countries in which it operates, in addition to filling in gaps where environmentally mindful regulations do not yet exist. Through monitoring metrics that track our environmental impact, the Company can better manage data, oversee results and identify more relevant risks and opportunities as it further develops its environmental management practices.

### Energy

Arena strives to utilize energy in an efficient, cost-effective, and environmentally conscious manner. The Company is implementing an energy management strategy to better understand the impacts of energy and emissions on its business objectives.

To achieve these goals, Arena is actively working to:

- Disclose total energy usage at company headquarters;
- Disclose total renewable energy used;
- Establish reduction goals to minimize its carbon footprint;
- Promote employee adoption of clean energy vehicles;
- Encourage employee use of public transportation;
- Incorporate ENERGY STAR or energy-efficient appliances across locations; and
- Acquire Energy Star Certification at the Company’s main headquarters.

### Water

Arena recognizes the universal importance of access to clean water and understands the potential impacts the Company’s operations could have on this crucial resource. Arena maintains a core commitment to responsibly manage and reduce the intensity of its overall water consumption.

To achieve these goals, Arena is actively working to:

- Report total water usage at its headquarters for 2018 and 2019
- Establish defined water reduction goals;
- Support the UN Global Compact’s CEO Water Mandate; and
- Implement water saving appliances and features at all locations.

## **Waste**

Arena recognizes the importance of effectively managing its waste to protect the health of its stakeholders and the environment. The Company is committed to seeking out ways to reduce risk associated with waste, minimize environmental impact, and improve waste disposal practices across the enterprise.

To achieve these goals, Arena is actively working to:

- Collect data to track waste production totals;
- Increase recycling rate with the goal of reducing total waste to landfill;
- Evaluate new opportunities to recycle materials and limit waste generation; and
- Provide waste management training to employees who undertake responsibility for waste management activities.

## **Pharmaceuticals in the Environment**

Arena is committed to monitoring its operations to ensure that the manufacturing, testing, and disposal of our compounds do not have an adverse effect on the health and safety of clinical trial patients, communities, or environment. Arena is actively working to better understand potential impacts associated with pharmaceuticals in the environment and is taking steps to mitigate these impacts. For example, Arena seeks to engage environmentally responsible manufacturers to manufacture its investigational drug candidates.
